

## Water Filter Project, Udaipur

Pastor Tajendra Masih is very happy with the new water filter. The inhabitants of Pai region are also benefitted now with clean water. It was a long struggle for the people of Pai to live with impure water for many years. Now the struggle will get over with the new water filter gifted to them. The water filters in Panerva and Kotra are already giving us good results.

We are really thankful to John and Gill for their special contribution in the lives of the people at Pai. Water is life and clean water would surely enable healthy lives free of diseases. We look forward to a healthier community at Pai. Thanks I-Connect.

## Ashadeep NMM Health Centre, Udaipur

In the month of October one hundred and sixty patients availed services from our hospital. Most of these patients were badly affected by diarrhoea. During this month Shanta had visited one hundred and twenty five houses of the total 600 families of the community.

A child molestation case also came to our hospital. The ten years old girl was offered active treatment and counseling. The overall case was wisely managed by Sis Esamma. This moves our hospital to the level of an acting rehabilitation camp for such women.
