

St. Matthew's School, Udaipur

The vision of school ground extension is coming to a reality now. In the month of January the ground extension work began. For last one year we have been waiting for this to happen. A good ground is always a vital requirement for CBSE schools. The present extension doesn't give us the actual needed size of the ground, which is still a major need in the future.

However, the students can now play cricket, athletics, and other outdoor games. The school is running well and by this month onwards the admissions will begin.

Jeevan Jyoti Tailoring Centre, Udaipur

In this new year we have great expectations from our JJTC. Now there are some stable faces like Kamla, Meera, and Sugna in our center, who are successfully continuing their training. In the production team along with Rajkumari, there is addition of few more members like Leela and Geeta. After Mr. Debidutta's arrival there is now more stability and consistency in the tailoring center. We

have started getting good connections & business with the local market. Along with uniforms we have also started stitching ladies bags, luggage bags and other fancy items. However, we require some initial investment, which is around 250 pounds. This investment would be in buying good raw materials from the market at a cheap rate. We

hope to go to the next level this year. Thank you I-Connect for standing beside with us with your support.
